Physician Profile

Who: Audrius (Andy) V. Plioplys, M.D.

Department: Medicine

Specialty Certification: American Board of Neurology

Medical School: University of Chicago

Residency: Mayo Clinic Hospital for Sick Children, Toronto, Canada

Years at Mercy: 2

Office: Mercy Hospital and Medical Center, Alzheimer Center

Honors and Awards: Recipient of six research fellowships in neurology; invited lecturer to Lithuania, Mexico and Sweden; and recipient of five major research grants

Commitment to Medical Advancement: Author of 20 neurology publications and 31 neurology presentations. Pioneered major advancements in the diagnosis and treatment of many neurological diseases including Alzheimer's disease, autism and attention deficit disorder.

Recreational Activities: Squash and Tennis

Other Interests: Enjoys creating artwork using various mediums. Dr. Plioplys's work has been displayed in many exhibits around the world from Duluth, Minnesota, to Nivelles, Belgium. Harold Haydon of the Chicago Sun-Times in 1980 said Plioplys was "blessed with a splendid imagination," and that same year the curator of the Minneapolis Institute of Art, Stewart Turnquist, said "his work caused a fire in my mind."
